

NADJA'S VINEYARD RIESLING & E{NV}Y NADJA'S VINEYARD 2.0

EXPERIENCE THE TERROIR OF 2 VINEYARDS, A LANEWAY APART

It's undeniable that there's something special about this single vineyard at the south edge of our property. Perhaps it's the cooler temperature resulting from higher altitude or the thin topsoil under which a bedrock of limestone forces the roots to stretch downward. We may never quite understand the intangible mystery of terroir this vineyard showcases, but we can certainly try.

In 2014, we had the opportunity to experiment with our vines atop the escarpment. We trialed a new clone of Riesling just across the road from our iconic Nadja's Vineyard. We chose clone 239, native to Alsace and we're one of few wineries in Ontario growing it. This sister vineyard is flourishing and we made the decision to bottle this beauty as a single-vineyard wine.

Taste and compare the first ever side-by-side of Nadja's Vineyard and her sister E{NV}Y Nadja's Vineyard 2.0. Both Riesling, separated by a laneway, each with a distinct personality.

What's the difference?

2019 NADJA'S VINEYARD RIESLING

Location: Southwest corner of the vineyard.

Clone: 21B, native of the Mosel River Valley in Germany.

Vine Age: 19 years, planted in 2001.

Flavours: Lime, orange blossom and peach on the nose with hints of wet stone. The stone fruit and citrus play together on the palate with a beautiful mineral backbone. It's opulent and complex with a fresh finish of acidity that dances on the tongue.

2019 E{NV}Y NADJA'S VINEYARD 2.0 RIESLING

Location: Southeast corner of the vineyard.

Clone: 239, native of the Alsace region in eastern France.

Vine Age: 6 years, planted in 2014.

Flavours: Limestone chalkiness and punchy green apple on the nose. It's also showing some understated waxy savoury characteristics. Lean in texture with racy acidity on the palate, like biting into a crisp apple, mouthwatering and fresh.

Production: only 220 cases.

Thanks for coming on this Riesling exploration journey with us, enjoy!
